ABOUT

Backend Software Developer with **over 4 years** of commercial experience, working in teams ranging from small startups to large fintech companies, both remotely and on-site. Built full-cycle development processes, from gathering requirements to establishing fully automated release pipelines with test coverage and CI/CD. Expert in developing high-performance backend systems and integrating various technologies.

Being Agile certified, I'm involved in projects from start to finish – defining tasks, working with team's analysts and even customers, developing solutions, and managing releases. My team lead granted me the chance to take on some leadership responsibilities, so I had a positive experience mentoring new colleagues who were just starting out on our team.

Actively engaged in the open-source community, I've contributed to projects like ClickHouse, a prominent open-source DBMS. I'm a highly collaborative person, and that's not just in open source. My team and I recently won first place at a hackathon at Sber.

SKILLS

Python, C++, C, Rust, JavaScript, SQL, ClickHouse, PostgreSQL, CMake, Git, Docker, Kubernetes, OpenShift, Prometheus, Grafana, Kibana, ZooKeeper, Flask, Django, Spark, RabbitMQ, Kafka, Helm

WORK EXPERIENCE

Full Stack Software Engineer

August 2023 - Present, 1.5+ years

[digital.sfpe](#), a software development startup

- Developed from the ground up a comprehensive software solution tailored for fire protection engineering companies to ensure regulatory compliance. This solution automates critical processes such as contract management, data validation, format control, minimizes errors and proactively monitors deadlines. The implementation of this software significantly improved efficiency, enabling a **single person** to manage the workload that previously required **3-4 full-time employees**.
- Implemented autofill process for EMERCOM contract notifications, reducing the processing time per notification from 8-10 minutes to under 1.5-2 minutes (**over 80% speed up**).

Python Backend Software Engineer

July 2022 - July 2024, 2 years

[Sber](#), one of the biggest fintech companies

- Developed a utility for financial models for a high-value investment project, specifically valued at 2 billion USD, **accelerating** model calculations **by over 50%** through concurrent processing.
- Developed an automated data pipeline for depositary settlements, enabling fully automated data streams and eliminating manual intervention.
- Developed a team productivity dashboard for Scrum Masters, enabling data-driven decision-making and **increasing team throughput by 15%**.

C++ Backend Software Developer

October 2020 - May 2022, 1 year 8 months

[ClickHouse](#), opensource DBMS

- Researched and implemented UDP-based replication protocols (UDT, μ TP, ENet) for ClickHouse, evaluating their performance and laying groundwork for future QUIC protocol studies.
- Integrated Rust into ClickHouse build system, enabling C++ and Rust interoperability. Implemented and integrated the BLAKE3 hashing function, achieving almost **100% performance increase** with a new hashing function compared to existing functions.
- Implemented YAML configuration support for ClickHouse, providing users with a more readable and convenient configuration format.

EDUCATION

Master's degree in Computer Science. Queen Mary University of London, London, UK

Software and Data Engineering stream

Sep 2024 - Sep 2025

Bachelor's degree in Computer Science. HSE University, Moscow, Russia

Applied Mathematics and Informatics, Distributed systems

Sep 2019 - June 2023

PUBLICATION

More Than 2x Faster Hashing in ClickHouse Using Rust

Blog post describing the task of Rust integration into ClickHouse, its results, and efficiency improvements. ClickHouse CTO acknowledged the significant impact of this work in his comment in the post.

[ClickHouse Official Blog](#)

COURSES

IC Agile Certified Professional

December 2022

Completed Agile training, received the ICAgile Certified Professional

[Certificate Link](#)

Applied statistical analysis

May 2022

Completed additional Applied statistical analysis course, HSE University
